

Tods Aerospace to Present at Thermoplastic Composites 2017 in London

YEOVIL, UK, 2 October, 2017– Tods Aerospace, a Unitech Aerospace company and leader in advanced composite materials technologies, is pleased to announce that Sean Cooper, Materials and Manufacturing Development Manager for Tods Aerospace, will be giving a presentation entitled 'The Manufacture and Joining of Thermoplastic Composites in Aerospace' at Thermoplastic Composites 2017.

The presentation will showcase Tods Aerospace's thermoplastic composite manufacturing capabilities and will outline a newly developed rapid, low-cost welding process suitable for aerospace qualified glass and carbon fibre reinforced thermoplastic laminate.

Tods Aerospace is at the forefront of the UK supply-chain for thermoplastic composite aerostructures and interiors and foresees continued success from both private venture and collaborative R&D efforts in the development of new thermoplastic composite applications for aerospace and defence.

Thermoplastic Composites 2017 will be held on the 5th of October at the BPF House in London. The annual event, organised by Composites UK and the British Plastics Federation, will examine the growth of UK thermoplastic composites and will enable knowledge transfer on a cross-sectoral level. For more information on the event visit: <http://www.bpf.co.uk/events/thermoplastic-composites-2017.aspx>

About Tods Aerospace

Tods Aerospace specializes in advanced composite materials technology for aerospace applications. The Yeovil, UK based team enhances the performance of vital defence systems, aircraft interiors and air transport equipment worldwide through design, engineering and manufacturing. Tods Aerospace is a Unitech Aerospace Company.

About Unitech Aerospace

Unitech Aerospace provides the aerospace, marine, medical, defense, nuclear and rail industries with composite and metallic structures and components that meet demanding and complex requirements. The company's growing global footprint is
